ZigBee Wireless Mesh Networks

ABSTRACT:

ZigBee is the new standard that has been developed for low cost, low data rate and low power consumption wireless network. And mesh is a type of network architecture. This paper provides a brief overview of the available IEEE 802.15.4 topologies, and then delve sing the mesh topology, describing its advances, disadvantages and application, and presents a detailed study on open research issues in ZigBee mesh networks.

Theoretical network Capacity and real capacity formulas influenced by coverage and response time are discussed, followed by analysing the route discovery and route cost in detail. Finally, we introduce the security feature including trust centre and security modes.

SEMINAR

Organic Light Emitting Diodes

ABSTRACT:

The efficiency and lifetime of white organic light emitting diodes (OLEDs) have now reached at sufficient level for practical use in displays and lightings. High-resolution OLED TVs can be fabricated with highly-efficient white OLEDs and colour filters.

There are several attractive features in white OLEDs such as non-glare, less blue-light, high colour-rendering index, linear brightness control, thin and lightweight, that are great advantage for the lighting applications.

In this paper, first some key technologies for highly-efficient white OLEDs are explained, and then new material challenge for next-generation OLED is discussed. In addition, the latest researches on flexible OLEDs are also shown in some photographs. Finally, well-designed lightings for Smart Mirai House are introduced.

SEMINAR-ABSTRACTS

Three-dimensional integrated circuits

ABSTRACT:

Three-dimensional (3D) integrated circuits (ICs), which contain multiple layers of active devices, have the potential to dramatically enhance chip performance, functionality, and device packing density. They also provide for microchip architecture and may facilitate the integration of heterogeneous materials, devices, and signals. However, before these advantages can be realized, key technology challenges of 3D ICs must be addressed.

More specifically, the processes required to build circuits with multiple layers of active devices must be compatible with current state-of-the-art silicon processing technology. These processes must also show manufacturability, i.e., reliability, good yield, maturity, and reasonable cost. To meet these requirements, IBM has introduced a scheme for building 3D ICs based on the layer transfer of functional circuits, and many process and design innovations have been implemented.

Details regarding an optimized layer transfer process are presented, including the descriptions of 1) a glass substrate process to enable through-wafer alignment; 2) oxide fusion bonding and wafer bow compensation methods for improved alignment tolerance during bonding; 3) and a single-damascene patterning and metallization method for the creation of high-aspect-ratio .

Dear Kishore S,
B.Tech/B.E., Electronics and Communication Engineering
Nandha Engineering College

Candidate ID – 14000563

In continuation to our discussions, we are pleased to offer you the role of **Programmer Analyst Trainee** in Cognizant Technology Solutions India Private Limited ("Cognizant").

During your probation period of 12 months, which includes your training program, you are entitled to an Annual Total Remuneration (ATR) of **Rs.401,986/-**. This includes an annual incentive indication of **Rs.22,500/-** as well as Cognizant's contribution of **Rs.23,986/-** towards benefits such as Medical, Accident, Life Insurance and Gratuity. The break up is presented in **Annexure A**.

On successful completion of the probation period, clearing the required training assessments and subject to you being part of a delivery project, your annual Total Remuneration (ATR) would stand revised to **Rs.455,880/-**. This includes an annual incentive indication of **Rs.22,500/-** as well as Cognizant's contribution of **Rs.24,880/-** towards benefits such as Medical, Accident, Life Insurance and Gratuity.

Your appointment will be governed by the terms and conditions of employment presented in **Annexure B**. You will also be governed by the other rules, regulations and practices in vogue and those that may change from time to time. Your compensation is highly confidential and if the need arises, you may discuss it only with your Manager.

Cognizant is keen that there is a secure environment for clients and internally too. You are required to be registered with the National Skills Registry (NSR) and provide the ITPIN while joining the organization. Please refer Annexure B for more details.

Please note

- This appointment is subject to satisfactory professional reference checks and you securing a minimum of 60% aggregate (all subjects taken into consideration) with no standing arrears in your Graduation/Past-Graduation.
- Prior to commencing employment with Cognizant you must provide Cognizant with evidence of your right to work in India and other such documents as Cognizant may request.

We look forward to you joining us. Should you have any further questions or clarifications, please log into <https://campus2.cognizant.com>

Yours sincerely,

For Cognizant Technology Solutions India Pvt. Ltd.,

Suresh Bethavandu
Global Head-Talent Acquisition

I have read the offer, understood and accept the above mentioned terms and conditions.
