Solid Waste Management

SOILD WASTE MANAGEMENT- COMPOST WHAT YOU CAN"

-Department of Agriculture Engineering

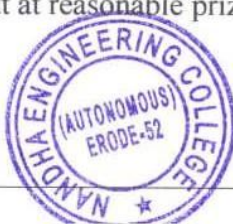

Collection of biodegradable organic waste from college campus to prepare Compost

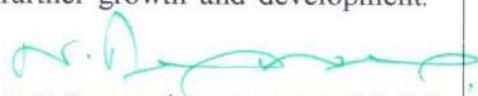

Fertility of the soil is highly essential for better crop productivity. To improve soil fertility and productivity of college farm, the landscape maintenance waste materials are collected time to time and heaped in the farm for composting. Waste materials such as leaves, twigs, flower plant parts, straw, woody pruning, grass clippings and weeds are collected. Grass clippings on the lawn are present in huge volume which is high in nitrogen content are added to the daily waste of the landscape.

Plants lose about 50 and 75 percent of their volume in composting, so a lot of plant material can be processed effectively. Composting waste recycles nutrients back into the soil and saves landfill space. Composting reduces waste volume by 50 to 75 percent. Composting not only keeps waste out of landfills and the water-wasting garbage disposal, it yields a highly nutritious soil additive that improves drainage, adds life and organic matter to compacted soil, and even helps fight off some plant diseases.

Frequent watering is done to maintain the moisture content of the heap. Turing is done once in a week to improve the aeration of the heap and also to reduce the temperature build inside due to decomposition activity of the microorganisms. After 40- 45 days the entire waste material is converted in to organic manure which is effectively utilized in the farm to improve the fertility status of the farm. Further, the compost is effectively utilized to prepare indoor potted plants.

Plants are cut at frequent intervals to maintain its structure in the college landscape. The plant parts that are removed are utilized and planted in mini pots of various size and watered daily for better plant growth. These pots are maintained under shade for further growth and development. Once grown they will be sold out at reasonable prizes.

Hazardous Chemicals Waste Management Policy

- The main objective of the Management of Hazardous Chemicals Policy is to prevent and control chemical hazards at workplace, and safeguard the health and safety of persons against chemical hazards inside the campus.
- Management of Hazardous Chemicals Programme should be conducted annually to ensure that it is relevant and up-to-date.
- Prior Orientation must be given to all the Students about the hazardous chemicals and the procedure for using them by following the safety procedures. First aid kits must be kept inside the laboratories for immediate medical attention.
- The Management of Hazardous Chemicals Programme must cover the safety and health aspects throughout the life cycle of the hazardous chemicals that are used or produced in a plant, transportation, storage, handling, usage and disposal of the chemicals and necessary orientation should be given to the lab instructors about the handling of hazardous chemicals.
- The Management of Hazardous Chemicals Programme enhances chemical safety and prevents chemical-related injuries, illnesses or diseases at the workplace.
- In addition, the floors should be equipped with appropriate fire fighting appliances and lab instructors should be trained in dealing with emergency situations.
- Loading, unloading and transfer operations are prone to accidents, and should be managed properly. Control measures should be implemented to reduce the risks.
- Management of Hazardous Chemicals Programme Review and Audit The management should conduct a review of. The programme should be subjected to regular audits to ensure that it has been implemented effectively.

WASTE MANAGEMENT POLICY

As Nandha Engineering College has been making very distinctive approach in the field of environment and sustainability, it shall pay considerable attention to minimize the production of waste on the campus. This policy visualizes to guarantying the moral, social and legal responsibilities of the College in creating an environment-friendly and sustainable world devoid of waste and manipulation of nature. This policy is a guidance document to the faculty and students to behave responsibly in the production of waste, waste segregation, storage, handling, transport and disposal.

Policy Statement:

Nandha Engineering College will adopt the principles of the 'best practicable environmental option' in the delivery of its waste management services. It intended to reduce, reuse, recycle and recover waste products in preference to the disposal of waste to landfill. We recognize the importance of meeting these legal requirements and to manage its waste responsibly, reduce the volume of waste sent to landfill and maximize reuse and recycling where possible.

Policy Objectives:

The objectives of this policy are:

- ✓ To provide appropriate training for teacher, resident, staff, students and other stakeholders on waste management issues.
- ✓ To promote holistic approach of waste management in the campus.
- ✓ To ensure that waste management is performed in accordance with all waste legislative requirements, including the duty of care, and to plan for future legislative changes and to ease their effects.
- ✓ To minimize waste generation at source and facilitate repair, reuse and recycling over the disposal of wastes in a cost-effective manner.
- ✓ To provide clearly defined roles and responsibilities to identify and co-ordinate each activity of the waste management.
- ✓ To promote environmental awareness in order to increase and encourage waste minimization, reuse and recycling.
- ✓ To invest into the expansion of recycling opportunities on the campus and transform waste into value added products.
- ✓ To ensure the safe handling and storage of wastes on campus.
