MENSTRUAL HEALTH AND HYGIENE MANAGEMENT

12.04.2023

A Health Awareness Programme on “MENSTRUAL HEALTH AND HYGIENE MANAGEMENT” was organized on 12.04.2023. The resource person was Ms. Roshnee Bhowmick, CSR Executive, Unicharm India.

The resource person opined that menstruation is a natural and biological process that every woman goes through, and it is crucial that we promote awareness and understanding to ensure the well-being and dignity of women everywhere. Further, she told that one of the primary concerns related to menstrual health is the lack of access to proper sanitation facilities. This lack of access not only compromises women’s health and hygiene but also restricts their ability to fully participate in education, work, and community life. She extended that education and awareness play a crucial role in breaking the silence and stigma surrounding menstruation. She wishes that menstrual health management should be integrated into broader healthcare systems. Women should have access to healthcare services that address their specific menstrual health needs.

She concluded by saying that menstrual health and hygiene management is a vital aspect of women's overall health, well-being, and empowerment. It is the collective responsibility of educated people to ensure that every woman and girl has access to the information, resources, and support they need to manage their periods safely and with dignity. Finally, She made a clarion call to all to work together to break the silence, end the stigma, and create a world where menstrual health is no longer a barrier but a natural and celebrated part of life. After the resource person’s address the students got their doubts clarified during the queries session.

Department of ECE

The Department of Electronics and Communication Engineering in Nandha Engineering College in association with Social Club(Aram sei) and all the children and 108 Emergency care had organized “Awareness programme on First Aid and its fundamentals” on 06.04.2023 (Timings 2.00pm to 4.00pm). All the faculty members, Non teaching members and students were attended the programme. All of them known about the importance of first aid (First Investigation Relief Symptom Treatment arrangement Immediately Disposal). while the accident made and immediate medical assistance offered to any ill or injured person, irrespective of the severity of the illness, to save a person's life till medical help or ambulance arrives. This is critical to prevent the situation from getting worse and to assist the injured person in recovering quickly. Also aware about ABCs of First Aid. If someone is unconscious or unresponsive, the basic principle of first aid that you need to know is ABC: airway, breathing, and circulation. Airway: If someone's not breathing, the first thing you need to do is clear their airway. The programme was really useful for all of them to know about basic necessity action to be taken immediately while met with an accident to safeguard the passengers in the vehicles.
