Description:

Agricultural Engineer's Association of Nandha has organized the Academic Seminar on 11th March 2024 on the topic of "ENTREPRENEURIAL STRATEGIES IN AGRICULTURAL ENGINEERING : ELEVATING SURVEYING AND LEVELLING PRACTICES" for the Final year Agricultural Engineering students. Dr. J. Jagadeesan, Associate Professor, Department of Civil Engineering, K.S.Rangasamy College of Technology, Tiruchengode Erode was the Resource Person. And he has explained detailed description in surveying and leveling with practical examples.

ELEVATING SURVEYING AND LEVELLING PRACTICES

- Surveying or land surveying is the technique, profession, art, and science of determining the terrestrial two-dimensional or three-dimensional positions of points and the distances and angles between them. Surveying is the process of determining the relative position of natural and man-made features on or under the earth's surface, the presentation of this information either graphically in the form of plans or numerically in the form of tables, and the setting out of measurements on the earth's surface.
- Levelling is a branch of surveying, the object of which is to establish or verify or measure the height of specified points relative to a datum. It is widely used in geodesy and cartography to measure vertical position with respect to a vertical datum, and in construction to measure height differences of construction artifacts

Program Outcome:

- The seminar was incredibly informative, providing a solid foundation in surveying principles and techniques.
- Appreciated the hands-on demonstrations and exercises, which helped solidify theoretical concepts.
- The speaker's expertise and clarity in explaining complex concepts made the seminar engaging and easy to follow.
- It would be beneficial to incorporate more interactive elements, such as group activities or case studies, to encourage active participation and reinforce learning.
- Providing supplementary resources or recommended readings for further self-study could help students deepen their understanding of specific topics.
- Including a Q&A session at the end of each segment or allocating time for questions throughout the seminar could address any lingering uncertainties and foster discussion.
